CLIMATE JUSTICE

AND

INDIVIDUAL RESPONSIBILITIES

INTRODUCTION

ESRA ÖZDEMİR

FOR EACH OF US

WHAT IS CLIMATE JUSTICE?

- Climate justice means ensuring equal right to life for communities most affected by the climate crisis.
- Countries and companies with high carbon emissions should take greater responsibility and support those impacted.

THOSE MOST AFFECTED BY CLIMATE CHANGE

Global warming affects everyone, but the poorest and most vulnerable are hit hardest.

These communities have limited resources to adapt.

RESPONSIBILITY OF MAJOR POLLUTERS

Climate justice tells us that the biggest polluters must take greater responsibility.

Industrialized nations should act more to protect nature.

INDIVIDUAL IMPACT

Our individual actions may seem small, but together they create a huge impact.
Daily habits can truly shape the future.

ENERGY SAVING

Saving energy is one of the simplest ways to protect nature.
Even turning off unnecessary lights makes a difference.

RECYCLING

-  Recycling protects resources and prevents pollution.
-  Plastic bottles should go to recycling, not the trash.

AVOIDING SINGLE-USE PRODUCTS

Using glass, metal, or cloth instead of plastic reduces harm. Giving up single-use products is the best investment in the future.

WATER CONSERVATION

Water conservation is a powerful tool against climate change.

Simple measures can make a big difference

LOW-CARBON TRANSPORT

Public transport or
cycling is eco-
friendly.

Less carbon means
cleaner air.

PROTECTING NATURE

Protecting nature also means
protecting future generations.

Planting trees is a simple yet
powerful action.

SHOPPING LOCALLY

 Shopping locally reduces
→ carbon footprints.

 Imported goods pollute more
during transport.

REDUCING CONSUMPTION

Consuming less is the
greatest gift to nature.

Not buying what we
don't need saves
resources.

COLLECTIVE POWER

When individual efforts unite, they become a strong social force. Small steps can change the world.

FOR A LIVABLE WORLD

 Our planet is our home and only living space. Protecting it is our
➔ responsibility to our children.” eallygreatsite.com

THANK YOU!

Thank you for listening. Together, we
can create a more livable world.
